Subject: RE: CORRT Publications-Non-compliant

Hi Karen!

Bummer about 9/3 - NYC is almost as fantastic as Chicago! ;-)

Since my time on the pilot study paper came from NIH funding, we can deposit the article in PubMed Central so that there is open access of the final publisher approved version of the article (not the fancy publisher version). The open access version will appear in Pubmed 12 months after date of publication. Sometimes the publisher deposits the approved version into PubMed Central (PMC) to get the PMC ID number, and sometimes we do this manually. In this case, I think that I can submit the article manually if you send me the final documents (text, tables, etc.) for the article as approved by the publisher. Can you send those to me? I will definitely touch base with David to get the latest and greatest to review.

Cheers,
 Mary

Hi Mary

Sorry - this is all the info I have -

Apologies for late response, just back from conference and started right into service this weekend!

The last version I have of PEM-CY is the version David sent earlier – I haven't worked on it since. Perhaps you can confirm with him in case he has updated it?

I will be in NYC Sept 3, so sorry to miss you!

OMG I love Chicago! We were just there in May and it is one of my favourite cities! I will be there to visit you for sure! Such great food. Yes, I will keep it confidential until officially announced.

It is I who has to thank you, for continuing to teach me and open my eyes to learning about recovery and participation and function!

Will send update soon on Wee-cover's progress – at this rate we should wrap up enrolment by Dec, + 6 more months for follow-up. Qualitative interviews being analysed now (15 completed) so am interested to hear back soon what these reveal.

Take care, and I will keep all appendages crossed re: NIH loan repayment – sorry I'm not more helpful re: the PMCID #. I don't know what the NIH MSID no. is – do you know how/who I can get the required info from and I will do my best to get it for you?

Thanks

Karen

Karen,

Please see below - does the article have a PMCID number or an NIH MSID number?

Thanks,
Mary

Hi Mary

I am working on the CORRT progress report and I see one of your article does not have a PMCID number. Is it in progress? If so, can you send me the NIH MSID number instead? The articles is:

Khetani MA. Functional recovery following critical illness in children: The "Wee-Cover" pilot study. *Pediatr Crit Care Med*. 2015;16(4):610-18. PMID: 25651047

Thank you for providing me the information. If you do not have the information, I will have to remove it from the progress report.

Have a nice weekend
Alisa
